## 5G & IoT: The New Internet of Everything

How High Speed Wireless Communications Linking the Physical World Will Drive Disruptive Change and Spark Innovation Across Businesses, Industries, and Society

5G. The Internet of Things. Everyone's heard of them. But what makes them different from what we already have? Sure, it'd be nice to download videos faster, but do my forks and spoons need to talk to each other? What can these new technologies really do for my business?

Turns out, quite a bit! Imagine smart energy applications that can cut power instantly on detection of a local disruption – virtually eliminating blackouts. What about robotic surgery? Not from the next room over, but from the other side of the globe – by the world's best. Or autonomous vehicles that don't merely navigate on their own, but continuously communicate with other vehicles and even the roadway infrastructure itself to minimize travel times and increase safety.

And, combining 5G & IoT with other emerging technologies such as AI and blockchain leads to even more astounding capabilities. For example, picture a manufacturing plant that reroutes material flows on the factory floor and reprograms production machines in real time in response to changes in demand for various products at retail – several tiers down the supply chain!

5G and IoT will deeply disrupt your business and your industry. But it will also enable powerful innovation. Jack shows you how to design your 5G/IoT strategy for a sustainable competitive advantage.

Jack will customize this program for specific industry verticals or business functions on request. Examples include:

***5G & IoT: The New Internet of Logistics and Supply Chain Management***

***5G & IoT: The New Internet of Manufacturing and Distribution***

Jack can also custom craft this presentation for technology solution providers. These customized programs can be delivered in-house or at customer conferences and marketing events.

Jack integrates his executive experience in Industry, technology, and consulting to speak on Innovation, Change Management, and Transformational Leadership. And, he brings decades of experience designing, developing, and implementing emerging technologies to speak with a deep understanding of 5G, the Internet of Things, and such other leading-edge technologies as Artificial Intelligence and Blockchain and how these will impact business and society.

Jack Shaw is an Innovation and Change Management Strategist with more than 30 years' experience helping leaders transform their organizations' digital ecosystems amid new waves of technology. A Global Thought Leader, he was voted one of the World's Top 25 Speakers and one of the Top Five Technology Futurists in polls conducted by Speaking.com.

Having a sensible, practical approach to how tomorrow's new technologies will drive change and spur innovation, Jack has advised key decision-makers at such Fortune 500 organizations as Mercedes Benz, GE, Coca-Cola, Bosch, Johnson & Johnson, IBM, Oracle, and SAP.

Jack has delivered over 1,000 keynote discussions and executive forums in 26 countries and every state across the U.S. He is a Yale University graduate, and he holds a Kellogg MBA degree specializing in Finance and Marketing.
